Datasheet

ESET® Mail Security for Microsoft® Exchange Server

Malware distributors frequently exploit email to spread infections, making the protection of your company's mail server the essential first line of defense. ESET Mail Security for Microsoft Exchange Server eliminates all types of email-borne threats and unsolicited email, with harmful content filtered away at the server level—before it can do *any* damage.

KEY BENEFITS

Proactively protects against viruses and other malware	ESET ThreatSense® technology uses industry-leading heuristic malware detection to keep your business data safe from known and emerging threats while keeping false positives to a minimum.
Keeps your system running fast	The optimized filtering and system maintenance tools leaves more processing power for server tasks, like delivering the emails that keep your business profitable. The small system footprint ensures optimal processing efficiency, maximizing server performance and extending the useful life of older hardware.
Secures mailboxes and the resident host	This is comprehensive security that has all the tools and features to protect not just Exchange mailboxes, but the server itself. Dual email scanning methods—VSAPI and message filtering on the SMTP server level— ensure email traffic has optimal protection.
Easy to install and set up	ESET Mail Security is a simple set-and-forget solution that delivers advanced installation options as well as the ability to import/export configurations and tools for remote administration. ESET Remote Administrator enables easy deployment and management of ESET Mail Security for Microsoft Exchange Server from any networked computer.

Award-winning performance

Rely on ESET, whose established track record of performance and reliability keeps winning recognition from independent testing organizations, such as Virus Bulletin and AV-Comparatives. ESET leads the industry in the overall number of VB100 awards, having received its first in 1998. ESET Mail Security for Microsoft Exchange Server won the prized Virus Bulletin VBSpam award with an impressive catch rate of almost 99.5 percent. The prestigious AV-Comparatives tests regularly rank ESET in the Advanced+ category for its overall performance and precise detection.

SYSTEM REQUIREMENTS

Operating systems
Microsoft Windows Server 2000 (x86),
Microsoft Windows Server 2003 (x86 and x64),
Microsoft Windows Server 2008 (x86 and x64),
Microsoft Windows Server 2008 R2 (x64),
Microsoft Windows Server 2012,
Microsoft Windows Small Business Server 2003 (x86),
Microsoft Windows Small Business Server 2003 R2 (x86),
Microsoft Windows Small Business Server 2008 (x64 or
Microsoft Windows Small Business Server 2011 (x64),

Mail servers
Microsoft Exchange Server 5.5 (SP3, SP4) (x86), Microsoft
Exchange Server 2000 (SP1, SP2, SP3) (x86), Microsoft
Exchange Server 2003 (SP1, SP2) (x86), Microsoft
Exchange Server 2007 (SP1, SP2, SP3) (x64) or Microsoft
Exchange Server 2010 SP1, SP2 (x64),
Microsoft Exchange Server 2013

KEY FEATURES

Antivirus and antispyware	Keeps known and emerging forms of malware from entering your network via email.
Advanced antispam with score dials	Filters out unsolicited email messages, scams, phishing and frauds. Score dials enable setting of antispam threshold levels. Enables spam rules to be set up according to country code, language, character sets and other parameters. Enables use of third-party block lists such as RBL, LBL and DNSBL.
Centralized management	Manage all ESET products from a single console. Apply policies and rules, monitor detections and remotely configure from any networked computer.
Customizable rules	Sets rules based on your security policies and automate email scanning and quarantine handling. Real-file-type detection enables scanning rules to be set by extension type.
Enhanced compatibility	This solution is compatible with Microsoft Exchange versions 5.5 to 2013. It supports Windows clustering as well as Mailbox, Edge and Hub server roles.
Automatic detection of MS Exchange folders	Provides smooth and trouble-free operation of your email servers.
Robust quarantine functionality	Enables the creation of separate quarantine configurations for individual mailboxes.
Performance monitoring	Records system activity and enables administrators to optimize server performance.
Automatic exclusions	Automatically detects and excludes critical server files not at risk for malware to provide smooth operation.
Spam log	Displays sender, recipient, spam score, classification reason and action taken.
Greylisting	Blocks spam from non-RFC-compliant Mail Transfer Agents (MTAs) through built-in message verification, requiring messages to be sent again. Greatly improves antispam efficacy.
Greylisting log	Displays greylisted sender, recipient and action taken and shows status until connection denial period ends.
ESHELL Command Line	Offers an alternative command tool to the GUI for those who prefer using command line. Enables you to run scripts that automatically configure, modify configuration or perform an action.
Enhanced logviewer	Search and sort the spam log and other log results with ease.
License merging	Automatically merges two or more licenses with the same customer name for simpler license management.
Virtual environments	vmware READY CITRIX ready
