**ESET® Security
for Microsoft®
SharePoint Server**

ESET Security for Microsoft SharePoint Server provides proactive antimalware protection for secure collaboration on Microsoft SharePoint servers. Whether your company uses SharePoint for content management, team collaboration or as an enterprise portal, ESET Security for Microsoft SharePoint Server allows for worry-free searching, uploading or downloading of files to your SharePoint databases. Additionally, ESET Security for Microsoft SharePoint Server supports your IT policies through content filtering—blacklist or whitelist the content you choose to store in SharePoint.

KEY BENEFITS

Proactively protects against viruses and other malware	ESET ThreatSense® technology uses industry-leading heuristic malware detection to keep business data safe from known and emerging threats while keeping false positives to a minimum.
Secures SharePoint databases and the resident host	This comprehensive security solution has all the tools and features to protect both the SharePoint database and the server itself.
Keeps your system running fast	Optimized filtering and system maintenance tools leave more processing power for server tasks. The small system footprint ensures optimal processing efficiency, maximizing server performance and extending the useful life of older hardware.
Low system demands	Delivers proven protection while leaving more system resources for the server's vital tasks.

AWARD-WINNING PERFORMANCE

ESET has established a track record of performance and reliability, and continues to lead the industry in proactive threat detection. The proven detection capabilities and low system demands of our security solutions continue to be recognized by independent testing organizations. ESET NOD32® detection technology has achieved the longest unbroken string of Virus Bulletin VB100 awards—a testament to the consistent high-quality performance of ESET security across all platforms. ESET also holds a long string of accolades including the prestigious AV-Comparatives Advanced+ award, which ranks ESET solutions in the highest category for overall performance and detection capabilities, with low false positives.

SYSTEM REQUIREMENTS

Operating systems:

Microsoft Windows Server 2012
Microsoft Windows Server 2008 R2
Microsoft Windows Server 2008 (x86 and x64)
Microsoft Windows Server 2003 (x86 and x64)

Microsoft Small Business Server 2011
Microsoft Small Business Server 2008
Microsoft Small Business Server 2003 R2
Microsoft Small Business Server 2003

Supported SharePoint versions:

Microsoft SharePoint Server 2013 (64 bit)
Microsoft SharePoint Server 2010 (64 bit)
Microsoft SharePoint Foundation 2010 (64 bit)
Microsoft SharePoint Server 2007 (32 & 64 bit)
SharePoint Services 3.0

KEY FEATURES

Antivirus and antispyware protection	Eliminates all types of threats including viruses, rootkits, worms and spyware. Provides full-fledged host server protection to ensure stability and availability of the SharePoint Server host machine. Performs real-time on-access scanning of the server-stored data and on-demand or scheduled scans of any content stored within the SharePoint database structure. ESET self-defense prevents malware and unauthorized users from disabling the security of the system. Advanced ThreatSense technology provides fast and accurate scanning with minimal system impact.
Database content filtering	Prevents unauthorized downloads or inappropriate uploads of hundreds of types of documents based on actual content—not just file extension. Applies rules to fine-tune database protection and optimize your scans. Custom rules scan by file name, file size and content (real file-type).
Intelligent server operations	Password-protects uninstallation. Automatically recognizes server software such as Microsoft SQL Server and Microsoft IIS and detects server roles to exclude critical server files like data stores and paging files. Integrates with Microsoft VSAPI technology and Microsoft SharePoint Object Model.
ESET SysInspector®	Performs in-depth system analysis to identify potential security risks.
ESET SysRescue®	Creates an automatically bootable OS image with installed security solution to clean deeply nested malware and restore system operations.
